Re: Construction Updates/Water Shut Offs – Nautilus Construction

Court 1:

At this time the plumbing construction for the interior of units has been delayed except for the units that are currently open in Court 1 (units 107, 110-112, 113, 114 & 116.)

In those units, construction will continue as planned: re-piping, replacement of drywall, paint and texture.

The General Contractor encountered an unforeseen plumbing issue - a water shut off valve was discovered not to be functioning properly. This is the cause of the current low water pressure. A Water Shut Off is still scheduled for Wednesday, 8-1-18 in order for Construction to complete interior work on units listed above.

A revised schedule will be emailed and posted on doors well in advance, once the water shut off valve has been repaired.

The Plaza Condominium Association thanks you in advance for your patience and cooperation during this time.

Restrooms available during the Water Shut Off - Pool at Court 5
